Product launch: Safety Controller - FS1A-C21S

Dear Sirs,

We would like to inform you we are launching a new safety controller: FS1A-C21S.
Details are as follows:

(1) Item

FS1A Series: FS1A-C21S

(2) Background

Our new FS1A-C21S safety controller has been developed with 11 pre-programmed circuit logics in order to fulfil the needs of industries and customers our FS1A-C11S could not meet. In addition to the 24 circuit logics of FS1A-C11S, our FS1A series now offers a variety of 35 circuit logics, which can meet the requirements of a wide range of applications and industries.

(3) Product features

11 circuit logics including:

- 4 logics for injection moulding machines (22d, 24A, 24b, 24d)
- 1 logic for welding robots (24C)
- 1 logic for spring forming machines (23C)
- 2 logics for automotive manufacturing equipment (22b, 22C)
- 1 logic for metal stamping presses (22A)
- 2 logics FS1A-C01S (now obsolete) also had (201,208*)

*Logic 208 has a different value from logic 008 (FS1A-C01S) for input devices: 1NO/1NC instead of 2NO.

(4) Orders

HQ is now ready to receive your orders.

Price information: please refer to the attached file

Delivery time: please confirm with our CRM
